speaker

Yiannis Lazarou

Short paragraph about the topic:

This webinar aims to present the main aspects and educational advantages of a short math/science & languages theatrical play, written, organized and presented by the students themselves and its benefits inside a STEAME-education environment. It also aims to help the teachers/colleagues of primary and secondary education get familiar with the concept of math/science & languages theatre. A padlet app and an online handout will be provided for further guidance. Teachers (and/or students attending the webinar) will be facilitated to learn how to follow certain steps, in the process of writing/creating their own short theatrical play.

Short bio of the speaker:

Yiannis Lazarou is a teacher of mathematics at STEAM education of Pagkyprion Gymnasion in Nicosia, Cyprus. He is a member of the board of Cyprus Mathematical Society. Yiannis is also enrolled in various Erasmus+ and eTwinning projects with the latest being the “STEAME Teacher Facilitators Academy”. He is also promoting an active inclusion of Arts and Entrepreneurship inside a STEAME+ environment through educational theatre, presentations and workshops on various topics of the interdisciplinary approaches in a Project Based Learning framework.
